- November 7 - Tour LexMedia Studios

No meetings holiday weeks:
- November 21
- December 26
- January 2

Upcoming/proposed meetings:

Next week

TeamViewer demo

Following week ..

Command Prompt and Batch Files

Comcast Account administration and web builder

Precursor to further programs on website building

We will go into a lot of the administrative navigation for a Comcast account and demonstrate a template oriented website builder.

Google "website builder"
https://www.google.com/search?hl=en&site=&source=hp&q=website+builder&oq=website+builder&gs_l=hp.3..0l10.2435.2435.0.3815.1.1.0.0.0.0.0.65.65.1.1.0.les%3B..0.0...1c.1.8m6wT33CWOQ

Example
http://taipei-gourmet.com/

Comcast website:
http://home.comcast.net/~lexingtonseniors/

Two approaches

- Design website, then build it
- Select existing template and fit the information to it

How did I find the Comcast personal web builder?

www.Comcast.com > Sign in.

Support - search for personal web

https://customer.comcast.com/help-and-support/internet/getting-started-with-personal-web-pages

http://home.comcast.net/~lexingtonseniors/

http://home.comcast.net/~lexingtonseniors/Hello-world.html

Next meetings:

October 3 - Build a Comcast personal website in 10 minutes.

Al Sherman will demonstrate building a Comcast personal website in 10
minutes. (Figuring out how took a whole lot more than 10 minutes.)

This capability is no longer supported by Comcast, but help is provided by
user blogs. It should continue to work until Comcast removes it.

We will explore navigation of the Comcast account administration pages, and
encounter the current state of support (and non-support) provided. I suspect
this is typical of other ISPs as well as Comcast.

October 10 - TBA
