

Capturing: Videos, Audio and Images

George Gamota

Topics to Discuss

- After Movie Maker
- Capturing still screen shots
- Capturing Videos
- Capturing Audio

Capturing Images

- Why
 - Add to your collection of trips, museums, fun...
- How
 - Go to Goggle Images
 - Copy (usually in JPG format)
 - Select a name
 - Save in designated Folder
 - For those Images that will not copy, use Snipping Tool

Capturing Videos

- 1) You want to download a video, snip it and include the snip in Movie Maker
- 2) You have a musical video and want to use the audio track on your
 - Movie Maker
 - Make a CD
 - Or play it on iPod
- 3) Some other combination

Problems

- Formats used vary, e.g., Microsoft's Movie Maker does not recognize YouTube format.
- iTunes does not same format as MP3
- etc

Today's Short Talk

- Cover downloading YouTube Videos and making them available for use in Movie Maker

Quick Test

YTD

The screenshot shows the YTD Video Downloader application window. The title bar reads "YTD Video Downloader". The interface has a blue header with the YTD logo (a red circle with a white arrow pointing down) and the text "BASIC YTD". A red "Upgrade Now!" button is located in the top right. Below the header, there are four tabs: "Download" (selected), "Convert", "Activity", and "Play". The main area contains a text input field for a URL, a "Paste URL" button, and a link "For multiple URLs go PRO!". Below this, there are settings for "Download quality" (set to "Best Available"), "Save to" (set to "C:\Users\George\Documents"), "Automatically convert to" (set to "Ipad Video (MPEG-4 MP4)", with a "PRO" badge), "Conversion quality" (set to "High"), and a checkbox for "Delete original file after conversion". A large red "DOWNLOAD" button is at the bottom right. The footer contains links for "About YTD", "Video Sites", "FAQ", and "Contact Us".
