## Comments:

-- **“LINUX not for the top 92% Computer Population that use Simple Computing Mobile Devices”**

*(Why did the Steering Committee schedule LINUX in Potpourri?)*

-- **More for the Hobbyist : [Linux Format](#) named Mint the best distro for 2012**

**perhaps need try it, ought find it more than for hobbyist**

**Question - Printer Support; LINUX includes Printer Support,**

**more and more Printer Vendors include Printer Drivers**
